Camera Ready Artwork

All artworks supplied by you, the customer, must be camera ready. What this means is that we, PrintOGraphics, will assume that all technical issues associated with document size, halftone, fonts, format, bleeds, vector graphics, colors, DPI, registration, color-separations, etc. have been taken care of by the designer.

If the printing of the job is not correct because of any of these issues, you, the customer, will still be responsible for making a complete payment to PrintOGraphics. Our prepress department will be looking for such mistakes, but we may not be able see them all. If we find a mistake, we will contact you to get them resolved. Our design department can fix most mistakes at the cost of $75/hr ($20 min) with your approval.
